+19786977831

A clinical trial researcher turned corporate leader, with a track record of scaling and managing growth, my work is rooted in rigor, coalition building, and strong leadership.

My work has been featured in WIRED, Washingtonian Magazine, Federal Computer Week, and MobiHealth News.

Past clients include Centers for Medicare and Medicaid, Committee on Afforable Quality Healthercare, and U.S. Department of Defense's Business Innovation Research Program.

Service Experience Lead

U.Group

(formerly Agency CHIEF)

Reporting to the Chief of Staff, I support executive office initiatives while leading experience design and research on 10+ concurrent public interest technology projects.

Externally, I serve as a subject matter expert on service design and civic engagement in the U.S. government.

Chief of Staff

OpenGov Foundation

2015 - 2017

Managed an $800k annual budget and all daily functions — including engineering, communications, human resources, fundraising, and customer success — for civic technology nonprofit.

Directed open government and civic engagement initiatives with dozens of national and local governments.

Created, developed, and executed growth strategy in conjunction with Executive Director and Board of Directors.

Operations Manager

U.S. House of Representatives

2015

Addressed and managed constituent communications across Massachusetts' Sixth District on behalf of Congressman Seth Moulton.

Analyzed and responded to over 2,000 inquiries per week.

Tracked legislative issues related to healthcare, telecommunications and government reform. Coordinated the launch of the Open Source Technology Caucus.

Business Development Manager

Synaptic Advisory Partners

2014 - 2015

Initiated $5M in closed business during the go-to-market phase of a patient care coordination platform built on Salesforce.com.

Developed organization-wide standards for content creation through website development, inbound marketing, and social media.

Consistently exceeded goals for lead generation, prospecting and converting new opportunities.

- Vendor Management
- Budgeting and Forecasting

Research Manager
Partners Healthcare

2011 - 2013

Validated health outcomes for early stage technology companies (Reflexion Health, Withings, Proteus) at the Center for Connected Health.

Led clinical research focused on cost savings for at-risk populations including remote monitoring of congestive heart failure patients, mobile app development for palliative care and predictive modeling for population health management.

Oversaw the administrative and financial management of 10+ grants and contracts amounting to $1M.

additional experience

Developer Extern
New America Foundation

Summer 2017

Supported the collection and analysis of internet speed data with visualizations, web development, and devOps at Open Technology Institute's M-Lab.

Published and presented developer guides for M-Lab's API.

Design Researcher
OpenGov Foundation

Summer 2017

Collaborated with a small research team to investigate the challenges and opportunities surrounding Congressional constituent communication.

Findings resulted in a widely accepted set of recommendations to Congress.
